Order by Number Only.

Do not Cut the Book.

To the Trade.

• • •

WE herewith present you one of our new Combined Catalogues, containing the Universal List adopted January 10, 1895, by the wholesale manufacturers of Sash, Doors, and Blinds.

We have endeavored to make this book as complete as possible, and you will find therein all necessary information for ordering Doors, Sash, Blinds, Porch Columns, Mouldings, Leaded and Art Glass Windows, etc.

We solicit the trade of regular dealers only, and all orders entrusted to us will receive our personal attention.

Thanking our patrons for the very liberal trade with which they have favored us in the past, and adding that we will endeavor to merit such in the future, we are

Yours truly,

ST. LOUIS SASH & DOOR WORKS.

DIRECTIONS FOR ORDERING.

Please observe the following Directions in giving orders, as it will often avoid errors and unnecessary delays.

Orders for Sash should state the size of the glass, number of lights in window, thickness, whether plain or check rail, glazed or unglazed. For segment or circle corner windows, always give the radius of the segment and circle corner, otherwise we shall make our regular radius, which is the width of the window. For circle head, segment head, and circle corner windows, always state whether they are wanted to finish circle inside and outside, like Plans 1 and 3, on page 11, or to finish circle on outside only, as Plans 2 and 4 on same page; also, where frames are made, we should have width and height of frame in the clear, and if not regular Western sizes give size of openings.

Orders for Doors should state size, thickness, number of panels and quality; if moulded, say if one or both sides, flushed or raised moulding; if more than five panels make sketch.

Orders for Outside Blinds should state size of glass, number of lights in window, thickness of blinds, stationary or rolling slats; if for segment head windows, give radius of segment; also state if for wood or brick building.

Orders for Inside Blinds should state exact size of opening, the number of folds (width of box, if any), and if panels or slats, and where blinds are to be cut.

Orders for Frames should state whether for a frame or brick building; if for a brick building, give thickness of wall; if for a frame building, give width of studding, and whether outside or inside, or both. For Window Frames, state if for plain or check rail sash, with or without pulleys. For inside door jambs, give the width of the jamb.

Orders for Mouldings should give plainly the number of the Moulding. We use the new Universal Book. (*See Last Pages.*)

PLEASE NOTE THE FOLLOWING.

It is economy to conform to regular sizes and styles as much as possible.

Be explicit in giving orders and state fully your wants. Do not assume that we know them.

When ordering work outside of regular styles, as given in this book, give sketch or section. A rude drawing will often answer the purpose.

Plans and drawings in detail should accompany all complicated orders, and specification giving bill of items, sizes, and the quality of material required, thereby saving delay and cost of alterations.

In ordering Sash, Doors, and Blinds *always give the width first.* Use terms, when practicable, as given in this book.

GRADES OF SASH, DOORS, AND BLINDS,

ADOPTED JANUARY 10, 1895,

By the Wholesale Sash, Door, and Blind Manufacturers' Association
of the Northwest.

DOORS.

No. 1 Doors.—Material in No. 1 Doors must be clear with exception that water stain and white sap and small pin knots not exceeding one-fourth inch in diameter may be admitted. Workmanship must be good. The Standard No. 1 Door may be glued, wedged, and pinned, or glued tenons without pins.

No. 2 Doors.—Material in No. 2 Doors may contain knots not to exceed three-quarters inch in diameter, and blue sap showing on both sides not to exceed fifty per cent in any one piece of the Door, and gum spots showing on one side only, and other slight defects, but the total number of defects (not including blue sap) shall not exceed ten in number on each side. Slight defects in workmanship admitted.

No. 3 Doors.—Material in No. 3 Doors may contain stained sap and knots not exceeding one and one-half inches in diameter, also small worm holes showing on one side only and slight streaks of fine shake. Fifteen defects other than sap stains and worm holes on each side may be allowed, also slight defects in workmanship. Panels made of woods other than white pine are admitted.

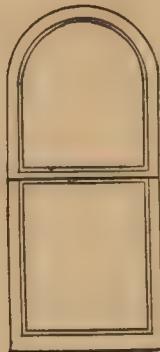

WINDOWS.

Check Rail Windows may contain not to exceed two knots in each piece of the sash, said knots not to exceed three-eighths inch in diameter. White sap and a small amount of blue sap may be admitted. Workmanship must be good.

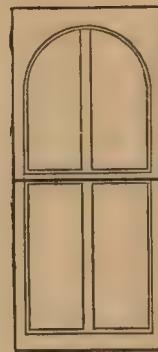

Plain Rail Windows and Sash may contain blue sap and (small) knots.

BLINDS.

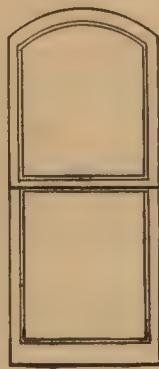

Outside Blinds must be made of clear lumber, except that small, sound pin knots and white sap may be admitted. Workmanship must be good.

CIRCLE AND SEGMENT TOP WINDOWS.**Fig. 1.**

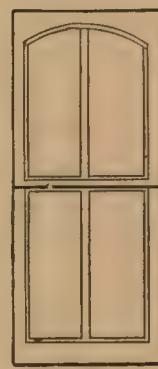

For Window Frames, Circle
inside and outside.

**Fig. 2.**

For Window Frames, Circle
outside, Square inside.

**Fig. 3.**

For Window Frames, Segment
inside and outside.

**Fig. 4.**

For Window Frames, Segment
outside, Square inside.

Windows made in the above forms can be filled with any number of lights required.

N. B.—A Window indicates two pieces. A Sash indicates one piece. A pair of Blinds indicates two pieces. A Blind indicates one piece. A set of Sash or Blinds indicates more than two pieces, and order should be accompanied with elevation.

GLAZED STORM SASH.

63

66

PLEASE NOTICE.

We make our Storm Sash with $2\frac{1}{4}$ -inch Stiles. If 3-inch Stiles are wanted, order must so state, otherwise we will send our regular width. We can make one or more Ventilators in bottom rail of each Sash, as per cut above. Price 10 cents each, net.

Storm Sash made to order only.

Write for prices, and give list of requirements.

IF VENTILATORS ARE WANTED, ORDER MUST SO STATE.

Place your order for Storm Sash early.

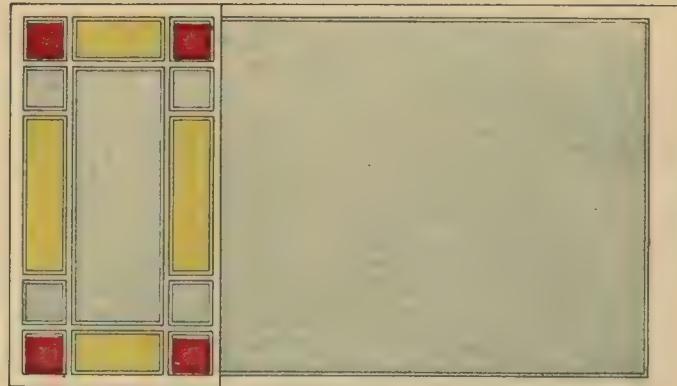

DURING the last years we have sold a great many so-called "Oriel Windows." The top sash of these windows is about one-third of the opening, whilst the bottom sash is about two-thirds of opening; thereby the check rail is placed high enough so as not to obstruct the view. We are prepared to turn these windows out very promptly, and show on the following pages a few fancy designs of Oriel Windows. We of course can glaze them also with plain glass in both top and bottom sash, or glaze the top sash with colored and plain glass, as shown in designs "A" and "B," or else with Leaded Art Glass, as shown in designs "C," "D," and "E."

We make these Oriel Windows to order only; thus, when writing for prices, give the outside measurement, thickness of sash, and, if possible, the size of each top and bottom sash.

Write for prices.

We can fill your orders promptly.

QUEEN ANNE SASH.

69

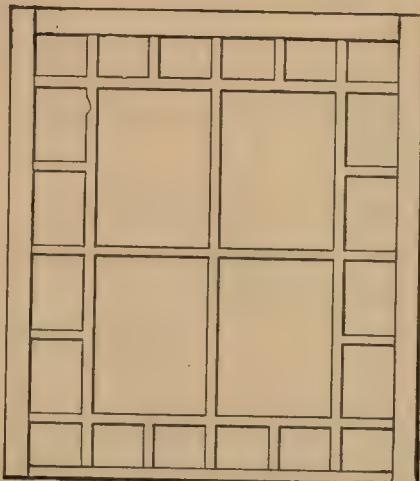

70

We make **QUEEN ANNE SASH** of every description. On the following pages we give a variety of Windows, also a number of Top Sash in separate cuts. Many of the latter can be utilized as Single Sash by changing the meeting rail to a wide rail. With Nos. 73 and 74 we give cuts of the extended Side Stile (or O G Lug) in vogue in some parts of the country. These cuts are given to facilitate and assist in making orders.

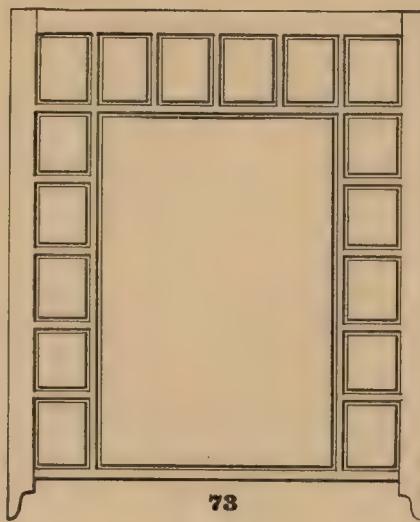

PLEASE BE EXPLICIT IN STATING YOUR WANTS.

WIRE SCREEN SASH.

130

For Large Windows.

131

For Medium Sized Windows.

132

We make Screen Sash as shown in above cuts to order only. No. 132 is intended to cover bottom sash only and works up slides. Nos. 130 and 131 cover entire opening of windows. In ordering give exact opening you desire to fill.

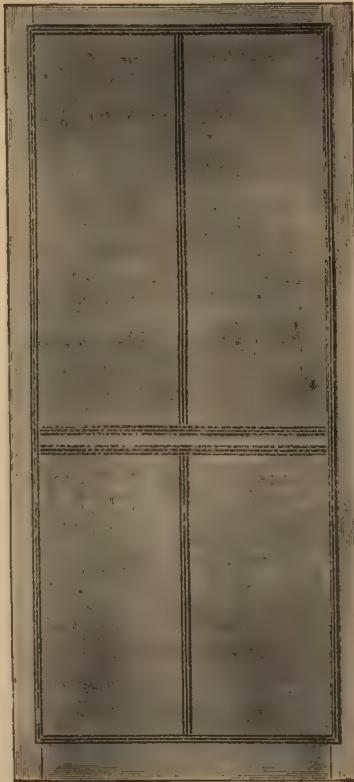

WIRE SCREEN DOORS.

We make no poor Screen Doors. Our No. 135, which is the cheapest, is of good material and well made; it will outlast two or three of the cheap, poorly-made doors which have nothing to recommend them but a low price.

We call your attention to the designs Nos. 161 to 177. These doors are intended for the better class of buildings, and we furnish them either in pine or any of our native hardwoods, such as Oak, Birch, Ash, etc.

We use fine 14 mesh black wire-cloth for these doors, which adds to the appearance and strength.

These doors are made only to order; we do not carry them in stock.

WIRE SCREEN DOOR.

135

We carry in stock Screen Doors as shown herewith in the following sizes: 2 ft. 6 in. x 6 ft. 6 in., 2 ft. 8 in. x 6 ft. 8 in., 2 ft. 10 in. x 6 ft. 10 in., and 3 ft. x 7 ft., both $\frac{5}{8}$ in. and $1\frac{1}{8}$ ins. thick.

These Screen Doors are made out of White Pine Lumber, are painted with two coats of good green paint and are covered with green wire cloth. We would especially call your attention to the fact that they are of a superior manufacture and are much preferable to cheap Basswood or Yellow Pine Doors that are offered by other manufacturers.

Please get our prices before purchasing.

WIRE SCREEN DOORS.

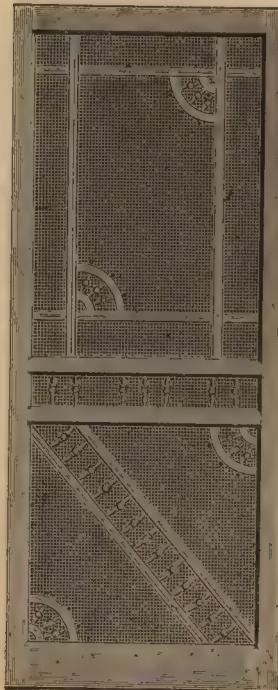

140

141

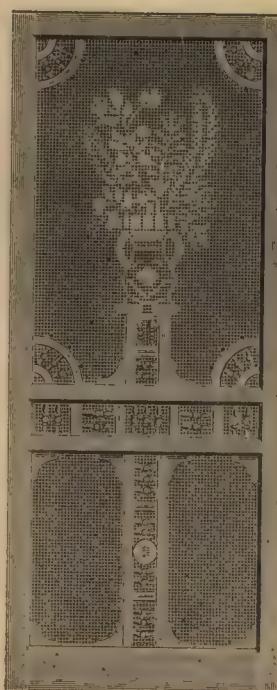

142

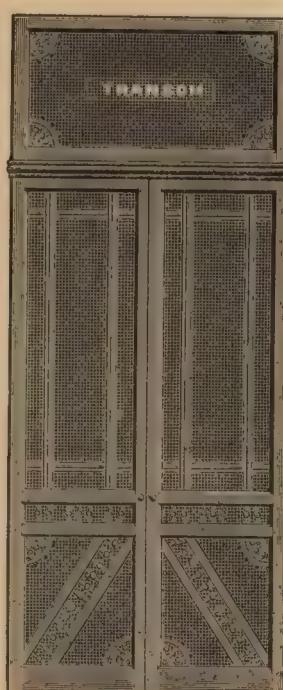

We carry this Door (No. 143) In stock, in the following sizes: 2 ft. 6 in. x 6 ft. 6 in., 2 ft. 8 in. x 7 ft. 8 in., 2 ft. 10 in. x 6 ft. 10 in. and 3 ft. x 7 ft. 14 in. thick, made of clear White Pine covered with the best black cloth.

VENEERED DOORS.

WE show on the following pages some modern designs of veneered doors which are now so extensively used in fine residences and public buildings. We make these doors with white pine stiles and rails, which are glued together out of narrow strips, thereby effectually preventing warping and twisting, and then veneer them. See cuts 984 and 985.

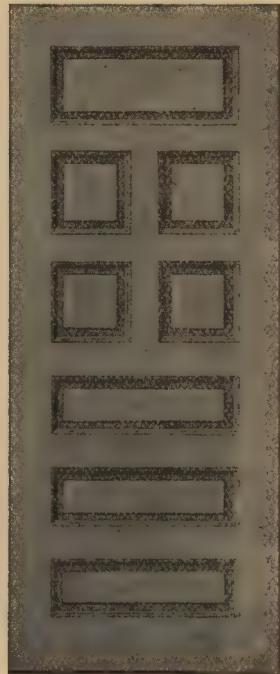

We make an excellent quality of veneered work, such as can not be excelled in this market.

Write for prices before purchasing anything in this line.

1½ inches thick, add to list price of 1½ inches, 20 per cent.

In ordering, state if Blinds are to be a pair or single piece, to each opening.

All Door Blinds are made in pairs and rabbeted, same as Window Blinds, unless otherwise ordered.

Sizes not listed, extra price.

1063

Three Panel Blinds.

HILL'S PATENT INSIDE SLIDING BLINDS.

We show on the following pages four different styles of Hill's Patent Inside Sliding Blinds. We are in a position to furnish these Blinds promptly, and claim the following advantages for them:

They require no hinges. All trimmings furnished with the Blinds.

They do not interfere with the curtains or window ornaments.

Light can be admitted from any part of the window.

They do not rattle nor get out of order.

They are easily and rapidly operated, and quickly removed to clean.

It is not necessary to have window frames made especially for these Blinds, as they can be attached to any window.

While it costs on an average \$1.00 to \$1.50 per window to hang the old fashioned folding Blinds, besides costing \$1.00 to \$2.00 for hardware, these Blinds can be put into place by any mechanic for 25 cents or less per window, and cost nothing for hardware.

Add for each Div., fitted with steel strip, 20 cents each, as shown in Class "D."

" " " Drop pull, 15 cents each, as shown in Class "D."

" " " Finger plate, 5 cents each.

" " Segment or circle top Blinds, \$1.00 each.

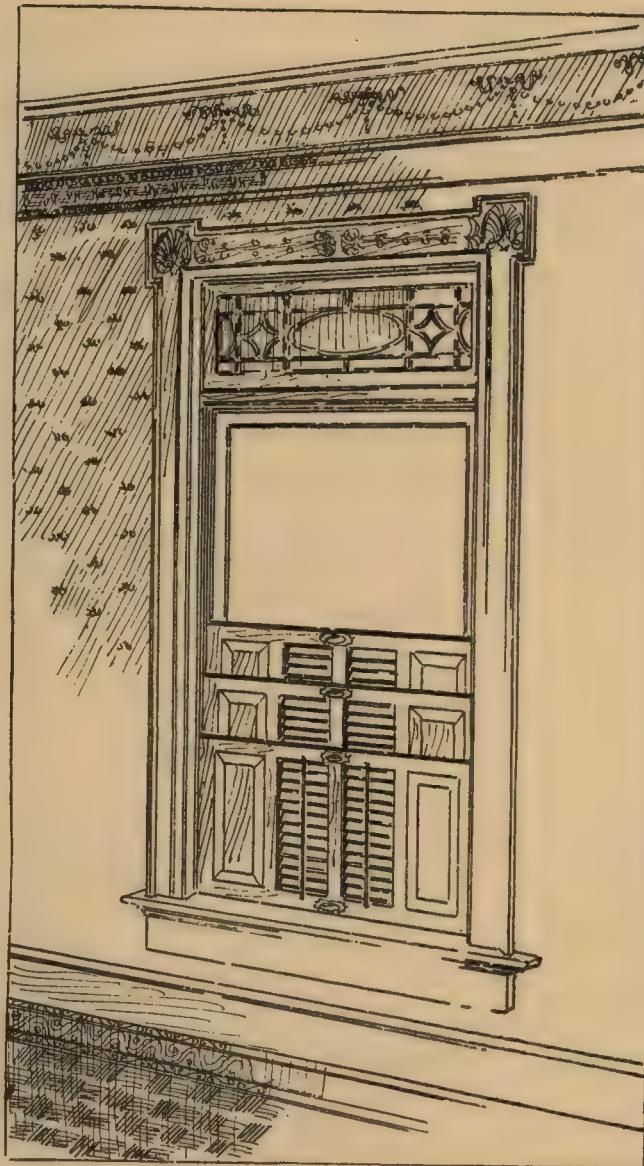

" " Convex or swelled Blinds, double the list for corresponding woods and sizes.

WHEN ORDERING

Give the exact measurement of opening to be fitted with Blinds. If guideways are to take the place of the stops, state distance from lower sash to face of casing; also state whether the window on inside is square, segment, or circle top.

Printed directions for putting in accompany each shipment.

Above prices subject to a discount.

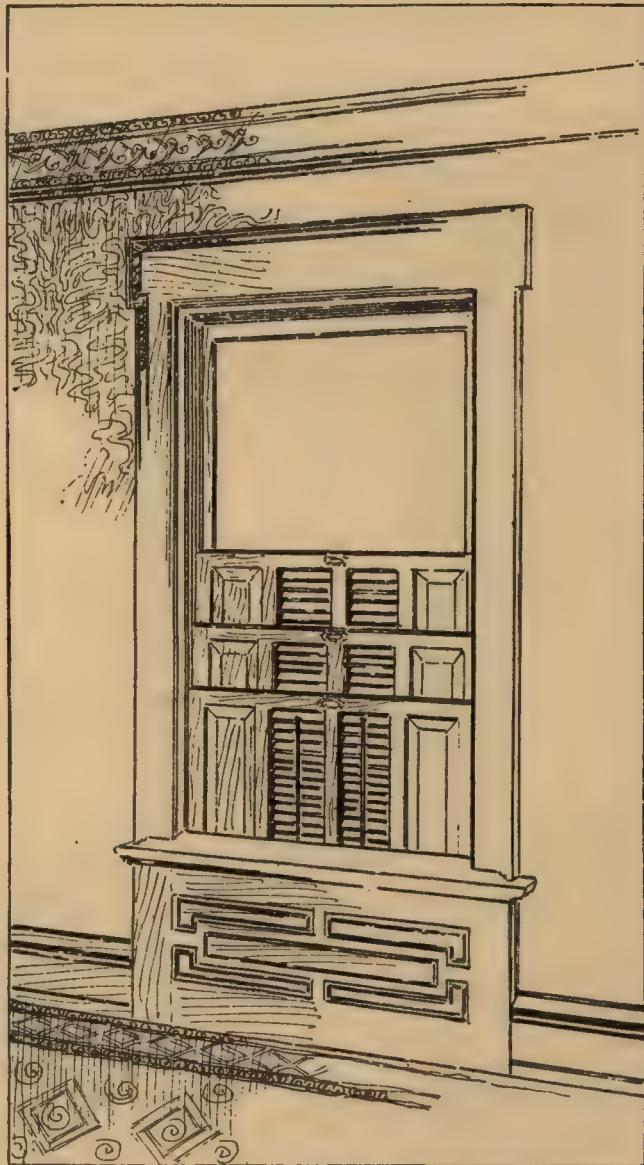

CLASS "A."

Cut showing Hill's Sliding Blinds in three sections and four divisions, opened one-half of the window, and can be adjusted to expose any portion of the window desired.

This class of blinds, when made of ordinary height—seven feet or less—is made in two, three, or four sections in height, and two, three, four, or more divisions in width.

This blind is made with the lower section all rolling slats or with panels in the outside divisions, as shown in above cut; the other sections may be made with panels in the outside divisions, stationary slats in the center divisions, or may be all stationary slats or pane's.

These blinds are trimmed with bronze lifts, and include all necessary springs and guideways. The guideways will be finished and blinds shipped either in the white or finished.

CLASS "B."

Cut showing Hill Blind, with pocket at bottom of window, into which the blind may drop out of sight.

This class of blind is designed to go into pocket when not in use; they are made substantially the same as Class "A," but require longer guideways.

The pocket at bottom of window must be especially constructed.

This window can be constructed so as to receive blinds into pockets at the top, or bottom, or both, as in Class "D."

This blind can be fitted with pulls, rolling slats, and device for operating, same as Class "D," at small additional cost.

The guideways will be finished, and no blinds will be furnished in the white when steel strip is used.

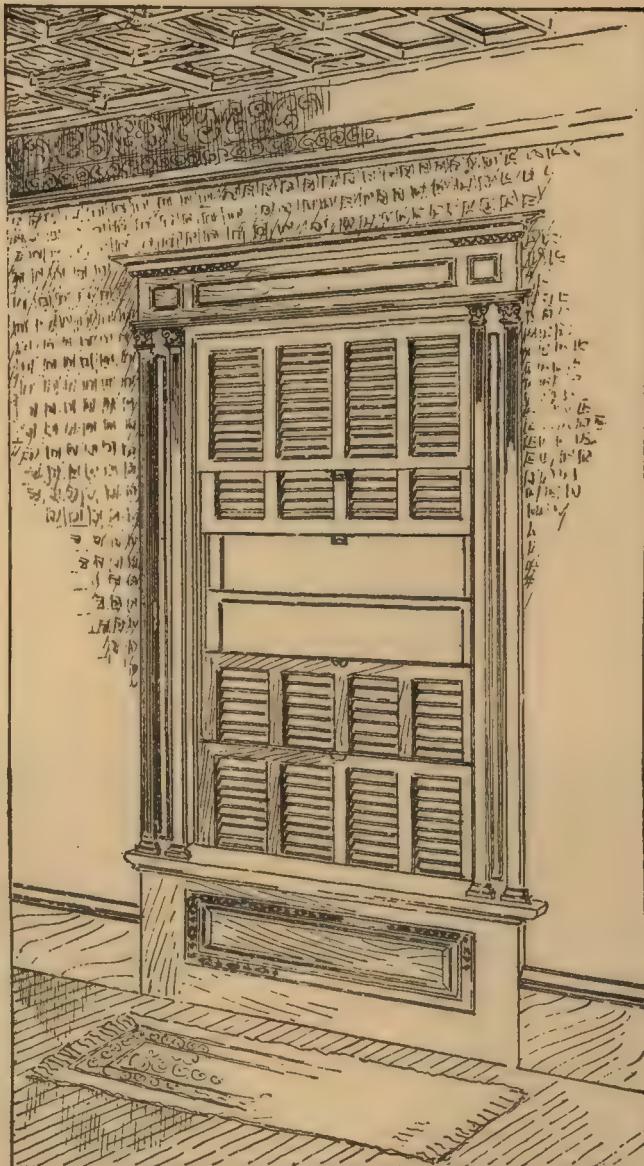

CLASS "C."

Cut showing Hill Blind running to floor. No pocket.

This blind is substantially the same as Class "B," except the front or lower section is made all panels, which gives it the appearance, when the blinds are lowered to the floor, as being a part of the finish of the room.

This blind can be fitted with pulls and steel strip, same as Class "D," at a small additional cost.

The guideways will be finished, and no Blinds will be furnished in the white when steel strip is used.

CLASS "D."

Cut showing Hill Blind, with top and bottom pockets, four sections in height, guideways with two grooves.

This class consists of four sections of blinds to the window, arranged in such manner that two sections go into pockets at top and two at bottom of window. The window must be especially prepared for the purpose and provided with pockets.

The guideways have two grooves each, and of sufficient length to extend into pockets. Two sections of blinds run in each groove. The entire window is uncovered when they are run into their respective pockets.

This class of blinds is trimmed with a drop pull and flat plate, as shown in cut.

WE show on the following pages the modern Venetian blinds, which are well known throughout Europe, and which have been in use for centuries, and which still remain great favorites.

The Venetian blinds that we furnish have been improved in a great many respects, so that we are now in a position to furnish, to the trade, a Venetian blind that can not be excelled. Only the very best material and workmanship enter into their construction.

The tape and cord are imported. We finish these blinds in all cases, using the best material for staining, painting, and varnishing, and would call your attention especially to the very fine finish we give these blinds. They are made in all kinds of wood and finished in any style desired.

These blinds are fastened into place with screws, either between sash stops or on the face of casing, as may be desirable, in the same manner as window shades; and any one capable of fitting a spring shade fixture can easily adjust our Venetian blinds.

Representing the Interior of a Room.
Showing the Venetian Blinds opened and closed in different parts, thus admitting
light and ventilation at any part of the window.

**PRICE LIST FOR
MODERN VENETIAN BLINDS.**

Silk Faced Tape, extra per yard, 25 cents.

No extra charge for plain cornice. No blinds made to figure less than 15 square feet. The above prices are subject to a discount.

DIRECTIONS FOR MEASURING FOR

MODERN VENETIAN BLINDS.

PLAN OF OCTAGON BAY-WINDOW.

When the distance from lower sash to face of casing is *not less* than 1½ inches, the blinds should be hung *between* stop beads. Give *exact* width between 1x2 and 3x4, and from window stool to window cap.

When the distance from lower sash to face of casing is *less* than 1½ inches; or, if the top of window frame is segment or circle, the blinds should be hung on *face* of casing. Give *exact* distance from points A x B, and C x D, which should be from 1 inch to 1½ inches back of 1x2 and 3x4. Give length from window stool to a point 5 inches *above* window cap.

We furnish brackets for blinds when it is necessary to hang them on face of casing.

The above directions will apply for measuring for all ordinary windows.

If the above directions are carefully followed, no mistakes or trouble need follow in fitting.

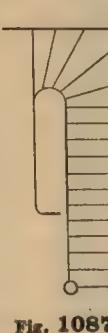

Fig. 1087

DIRECTIONS NECESSARY FOR ORDERING STAIRS AND STAIR RAILING.

When a flight of stairs is wanted, we should know the height of story from floor to floor, width of joists in second story, width and run of stairs, the size of cylinder, style of base used in the hall, with rough sketch showing about the shape of stairs wanted.

FOR STAIR RAILING, STRAIGHT FLIGHT,

We require the width of rise and step as sawed out on string board, the number of risers, the size of cylinder from face to face of string or face board, which way it turns at head of stairs, and the number of feet of straight rail required at landing. Unless we receive plan showing otherwise, we always suppose the top riser for a straight flight of stairs to be placed at the edge or spring of cylinder.

FOR CIRCULAR OR WINDING STAIRS.

We should have an exact plan of stairs as built, giving the width of rise and step, the location of risers in cylinder, etc.; and, when there are straight steps below or above the cylinder, always give the distance from the first square riser to the edge or spring line of cylinder, on the face of string or face board. *Always write your address in full on the plans.*

ORNAMENTAL GLASS

UNIVERSAL NUMBERS,

AS ADOPTED BY THE WHOLESALE SASH, DOOR, AND
BLIND MANUFACTURERS' ASSOCIATION
OF THE NORTHWEST.

NOTICE.

We give, on pages following, a number of new and modern designs from which customers can make selections. We solicit correspondence and estimates.

EXPLANATION.

Prices under designs are for double-strength glass and ornamentation. Dark parts of designs represent clear glass, and light parts ground glass.

All designs are photo-engraved direct from the glass, and are facsimiles.

Designs can be trimmed down without interfering with ornament.

Designs can be adapted to any reasonable size or shape.

Transoms can be made to match any door-light.

ORDERING.

Order by number only. Do not cut catalogue.

State width first and height last, as designs will be made in this manner unless otherwise stated.

Send full-size shape, if any, as designs will be made square unless otherwise stated.

GLASS.

We carry one of the largest stocks of Glass in the West, and solicit you trade in plain and fancy glazing.

AMERICAN OR FRENCH GLASS, POLISHED PLATE, ART AND LEADED GLASS,

For Public Buildings, Churches, or Private Dwellings. We carry in stock Plain Flashed Colored Glass, Plain and Obscure Enamel, Cathedral, Venetian, Ribbed, and Imported White Chip. We also furnish Bent Glass, either Plate, or Double Strength American, or French, and Cut Glass of fancy pattern. The cuts of Leaded Art Glass, as shown on following pages, are new designs, made expressly for this book by one of the best artists in this country. Our space will not allow of a larger assortment, but we furnish anything in this line, and at market prices. Send for cuts and get our prices before placing your orders.

We furnish Iron or Nickel Sash Bars when required, also Adjustable Metallic Sash for Bevel Plate Work, which is highly recommended by all first-class architects, being strong and durable, requiring no iron bars for bracing, and giving a very artistic effect.

In ordering color work, always specify whether light or dark shades are wanted; also what colors you prefer, as the selection is merely a matter of taste and does not affect price.

FANCY SHEET GLASS.

NET PRICES.

CUT TO SIZE AND SET IN DOOR OR SASH.

ENAMEL, PLAIN, OR OBSCURE.

Single thick 25c per square foot. Double thick 30c per square foot.

VENETIAN OR IMPORTED PATENT CATHEDRAL.

To Approximate Weight of Polished Plate Glass, Boxed.

Extend the glass at $3\frac{1}{2}$ lbs. per square foot. Weight of box equals the contents of a plate of greatest width and length of those packed therein, multiplied by 10. Thus:

$$\begin{aligned} & \text{1 plate } 36'' \times 96'' \\ & \text{1 " } 60'' \times 84'' \end{aligned} \left\{ \begin{array}{l} = 59 \text{ ft.} \times 3\frac{1}{2} = 206\frac{1}{2} \text{ lbs.} \\ \text{Size of box } 60'' \times 96'' = 40 \text{ ft.} \times 10 = 400 \end{array} \right. \quad \begin{array}{l} \text{606}\frac{1}{2} \text{ lbs.} \end{array}$$

Irregular shaped glass, or glass cut to patterns, will be charged as it squares.

Plates containing over 120 square feet, list price \$5 per square foot or fraction.

On orders for one or two plates only, a charge of 6 foot of box-lid will be invariably made to cover cost of boxing.

Odd and fractional parts of inches are charged at the price of the next highest even inches.

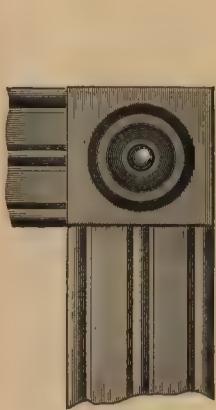

CORNER, PLINTH, AND HEAD BLOCKS.

We manufacture Blocks in a great variety of patterns, and of any wood desired. Prices are for White Pine; for other woods add as follows:

For Red Oak or Birch, add to list.....	50 per cent.
For Walnut or Cherry, add to list.....	100 "
For Chestnut, Sycamore, or Quarter-sawed Oak, add to list	75 "

Our Hardwood Blocks are Hand Smoothed.

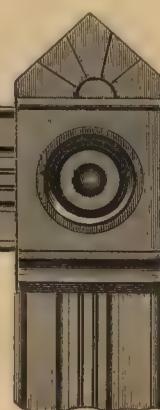

~~©~~ We sell Blocks in quantity desired. A liberal Discount to Dealers.

HARDWOOD MANTELS.

ON PAGES 286 TO 345 INCLUSIVE, ARE SHOWN A FEW DESIGNS THAT HAVE BEEN SELECTED AS MEETING THE POPULAR DEMAND.

SIZE. Stock size of all Mantels is 5 feet, but Mantels can be widened to 5 feet 6 inches by extending the wall plates. We will always widen Mantels in this way unless otherwise specified. If Mantel is wider than 5 feet 6 inches, or narrower than 5 feet, an extra price will be charged.

WOOD. Mantels marked made only in Red Oak or Birch, are manufactured in large quantities in these two woods, and carried in stock, consequently we are enabled to list them at a very low price. They will be made to order in other woods, if desired, at special prices. All other designs are made in any of the native hardwoods (see below).

TILES. Enameled and Embossed Tiles come in nearly every shade and tint. Where colors of tiling are not specified, we always select those which harmonize best with the wood of the Mantel.

TRIMMINGS. We can furnish Brass and Wrought Iron goods, Andirons, Fenders, Fire Sets, Frames, Grates, and Portable Baskets, Iron Linings, etc., and can ship any of these goods with Mantels.

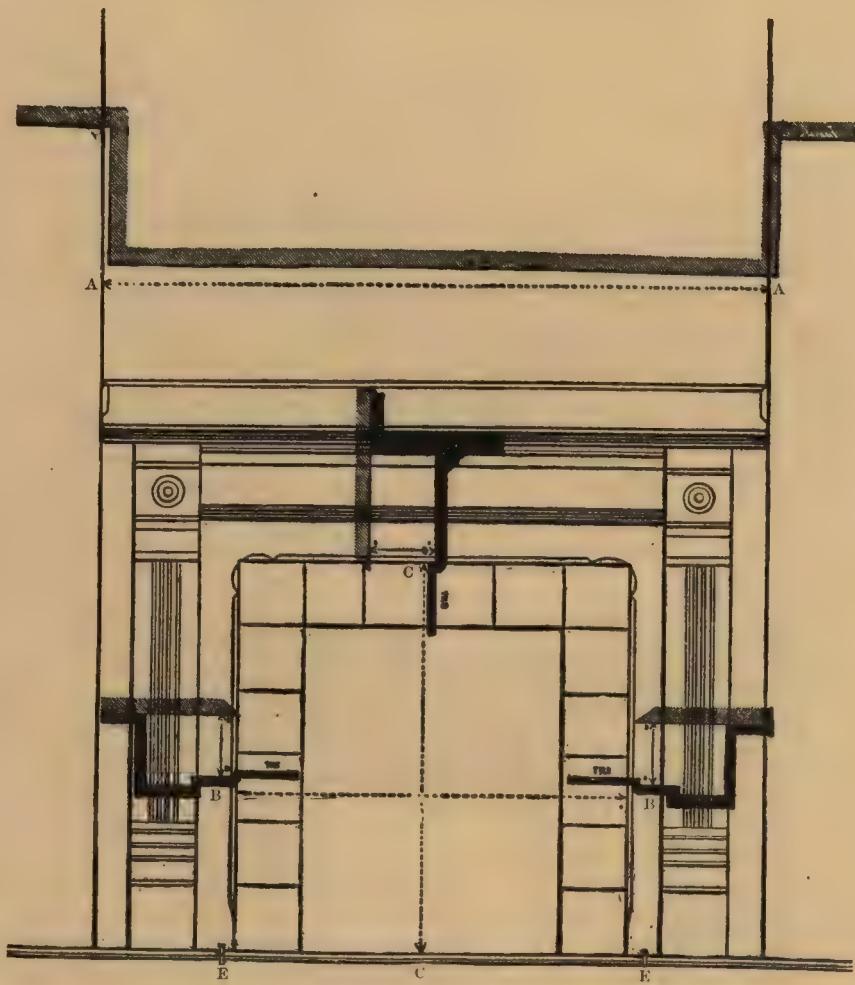

PRICES. We have made our prices in a way that will enable any one to arrange the Mantel they may select, with any of the trimmings shown in catalogue. Everything that is necessary to set the Mantel, just as shown in cut, is included, except 75 common brick and a little mortar. We name each article that we include.

NATIVE WOODS.

Red Oak, natural or antique.
Birch, natural or stained mahogany.
Cherry, natural or antique.
Quarter-Sawed White Oak, natural or antique.
Quarter-Sawed Sycamore.
Gum Wood.
Ash, natural or antique.
Walnut.
California Red Wood.
White Maple.
Butternut.
Sixteenth Century Finish, Cremona Finish, and Old English Oak.

EXTRA WOODS.

Mahogany, natural or antique.
Prima Vera.
Bird's-Eye Maple.
Curly Birch.
White and Gold.

Directions for Ordering. —

• • • •

FIRST. State number of Mantel

SECOND. State kind of wood wanted.

THIRD. State how finished, natural or stained.

FOURTH. State the width of chimney-breast between the points A and A, as shown on drawing.

FIFTH. State width and length of tile opening wanted in Mantel, giving size between the points marked B and B, also C and C, on drawing.

SIXTH. State profile, which is the distance between the points marked D and D on drawing, and represents the distance the face of tile is set from face of plaster. This measurement is often immaterial, as the workman who sets the grate can generally arrange his work to suit the Mantel. In every instance where this measurement is not given, Mantel will be sent with profile as indicated in Catalogue.

With each Mantel we send plugs to cover heads of screws with which Mantel is fastened to the wall. Also two small dowels. On the end of each inside lining of Mantel will be found a hole. After Mantel is fitted to place slip dowels into the holes, and after boring or drilling a corresponding hole in floor or hearth, insert the other end of dowels, as shown at E in drawing, thus fastening Mantel linings securely against face of tile.

Mantels ...

will be sent as shown in picture, unless otherwise specified.

All measurements given in foot notes are based on Mantels being five feet wide. All prices quoted in our Price Lists are for stock size.

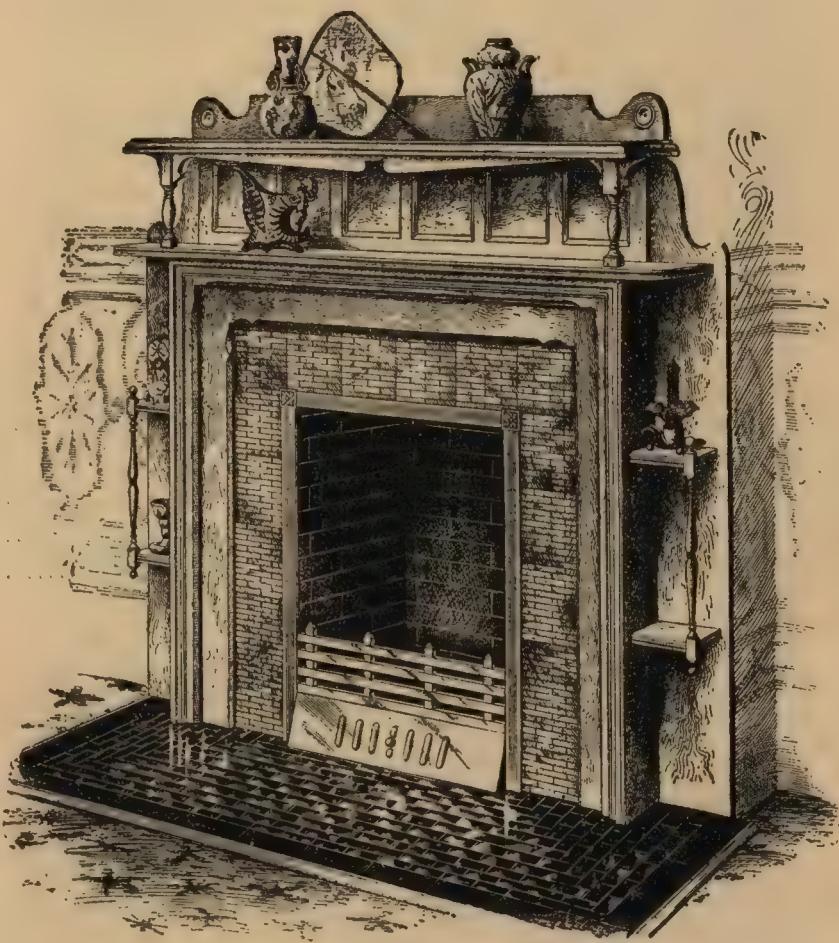

Stock Mantels are all made five feet wide, and we can make them any width up to five feet six inches by widening the wall plates. This we make no extra charge for, and will always widen Mantels in this way, unless otherwise specified.

If Mantel is wider than five feet six inches or narrower than five feet, an extra price will be charged.

DIMENSION SHINGLES.

We are prepared to furnish Ornamental Shingles, cut to any shape desired, and can offer inducements in prices. Write for quotations.

SHINGLES REQUIRED IN A ROOF.

To the square foot it takes 9 if exposed 4 inches, 8 if exposed $4\frac{1}{2}$ inches, and 7 1-5 if exposed 5 inches to the weather.

Find the number of Shingles required to cover a roof 38 feet long and the rafters on each side 14 feet. Shingles exposed $4\frac{1}{2}$ inches:

$$\text{Ans. } 28 \times 38 = 1064 \text{ (sq. ft.)} \times 8 = 8512 \text{ Shingles.}$$

16 "	30	36 "	67 1-2
20 "	37 1-2	42 "	75

Cubic Yard—600 bricks in wall.

Perch (22 cubic feet)—500 bricks in wall.

To pave 1 square yard on flat requires 41 bricks.

To pave 1 square yard on edge requires 68 bricks.

One-fifth more siding and flooring is needed than the number of square feet of surface to be covered, because of the lap in the siding and matching in the flooring.

One thousand lath will cover 70 yards of surface, and 11 pounds of lath nails will nail them on. Eight bushels of good lime, 16 bushels of sand, and 1 bushel of hair will make good enough mortar to plaster 100 square yards.

A cord of stone, 3 bushels of lime, and a cubic yard of sand will lay 100 cubic feet of wall.

Five courses of brick will lay 1 foot in height on a chimney. Six bricks in a course will make a flue 4 inches wide and 12 inches long, and 16 bricks in a course will make a flue 8 inches wide and 16 inches long.

LUMBER MEASUREMENT.**READY RECKONER.**

A table showing the number of feet, board measure, contained in each piece of scantling, joist or timber of the sizes given.

Size in Inches.	LENGTH IN FEET.														
	10	12	14	16	18	20	22	24	26	28	30	32	34	36	40

NOTICE.

 HIS Moulding Book and the prices
on the following pages supersede
and take the place of all previously
issued Moulding Books of any and all kinds.

Mouldings not found in this book will be
priced on the same basis as the mouldings
herein, provided they appear in some other
Moulding Book.

PRICE OF MOULDINGS.

PER HUNDRED FEET (*Lineal Measure*).

Adopted by the Wholesale Sash, Door and Blind Manufacturers' Association of the Northwest.

This list supersedes all former issues in conflict with it.

No.	Price.
